Website Development Proposal
Rwen Construction & Interiors Private Limited

1. Executive Summary

This proposal outlines the development of a modern, responsive, and SEO-friendly corporate website for **Rwen Construction & Interiors Private Limited**. The solution includes a premium user interface, dynamic content management system, secure Python Django backend, and a feature-rich Admin Dashboard. The website is designed to enhance the company's online presence, effectively showcase its services and completed projects, and simplify day-to-day content management through an intuitive administrative interface.

2. Project Objectives

- Premium responsive website
- Improve online presence
- SEO optimization
- Fast loading performance
- Secure CMS/Admin Dashboard
- Mobile friendly design
- Easy content management

3. Scope of Work

Website Pages

Home, About Us, Services, Projects, Gallery, Blog, Testimonials, Contact, FAQ, Privacy Policy and Terms & Conditions.

Admin Dashboard

Secure admin login with modules for banner management, gallery management, blog management, testimonial management, contact enquiry management website settings and user management.

4.Technology Stack Used

Frontend Technologies

- Next.js
- HTML5, CSS3, JavaScript

Backend Technologies

- Python
- Django

5. Project Timeline

Phase	Duration
Requirement Analysis & Planning	2 Days
UI/UX Design	5 Days
Frontend Development	8 Days
Django Backend & Admin Dashboard 8 Days	8 Days
Testing, Deployment	8 Days
Total Estimated Duration 28 Working Days	**28 Days**

6. Project Budget Estimation

Description	Estimated Cost
UI/UX Design	₹ 8,000
Frontend Development	₹ 12,000
Python Django Backend	₹ 10,000
Admin Dashboard	₹ 8,000
Testing & Deployment Support	₹ 4,000
Total	**₹42,000 INR**

7. Conclusion

The proposed website will provide **Rwen Construction & Interiors Private Limited** with a professional digital platform that reflects the quality of its interior design services. Built using **Next.js** for the frontend and **Python Django** for the backend, the solution will be secure, scalable, responsive, and easy to maintain. With a comprehensive Admin Dashboard, the client will have complete control over banners, services, projects, galleries, blogs, testimonials, and customer enquiries without requiring ongoing developer support. This project establishes a strong digital foundation that supports future business growth and online marketing initiatives.
